Front-desk Staff User Stories: *"As a front-desk staff member, I need to be able to ..."*

13	12	1	... easily access all the same information as an administrator, so that I can provide front-desk services to clients in person and over the phone. I should
14	13	1	... make tentative (i.e. requested) room-bookings on behalf of any client, so that clients can make bookings without having to contact an administator. I
15	14	1	... cancel events, so that I can help clients re-schedule.

Old #   **Priority #**   **Difficulty**   **Description**

Client User Stories: *"As an Storefront client, I need to be able to ..."*
These are all collectively prioritized at #15. When enough higher-priority user stories have been completed, these will be prioritized and assigned to sprints. The product champion has indicated that

1	15	0 *	... request room-bookings for my events online, so that I do not need to go to,
2	15	5	... see a map of the Storefront's bookable rooms, so that I can best decide which room is appropriate for my event. I should be able to see the room
3	15	1	... make recurring booking requests, so that I do not need to manually book a
5	15	3	... be notified by email whenever one of my booking requests is confirmed, so
6	15	1	... be notified by email whenever one of my booking requests is cancelled or
7	15	3	... see a table of which rooms are available at which times on a given day, so
8	15	0 **	... have my username and password stored in my computer, so that I don't
9	15	1	... I want to be able to change my profile information (e.g. contact information) on a user-settings page, so that I don't have to inform an
		*	We get this user story done "for free" by completing other user stories.

		**	Modern web browsers offer to automagically save login information for users, so we get this feature "for free".

Public User Stories: *"As a member of the public, I need to be able to ..."*
These user stories are already implemented on the Storefront's main website. The product champion

11	n/a	n/a	... see all upcoming events at the Storefront in one place, so that I can easily
12	n/a	n/a	... see detailed information about events that I am interested in, so that I can

Old # **Priority #** **Difficulty** **Description**

These are extremely low-priority user-stories that were deemed to be unnecessary, too poorly defined,

4	n/a	2	As a client, I want to notify the storefront management about materials that I
10	n/a	13	As a client, I want my subordinates to be able to book events, so that I can delegate tasks. Only I should be able to confirm their booking requests for an
16	n/a	2	As a front-desk staff member, I want to able to add/remove clients from a
20	n/a	2	As an administrator, I need to be able to distinguish booking times that have
23	n/a	13	As an administrator, I need to able to move scheduled events in the calendar view using a drag-and-drop approach, so that I can quickly reschedule room
25	n/a	13	As an administrator, I need to be able to see a map of the building and its rooms that identifies which rooms are currently occupied *at that moment*, so
